

PREPARING FOR INSTALLATION

Carefully remove all contents from the carton. Shut off the power at the circuit breaker and completely remove the old fixture from the wall, including the old mounting bracket. Remove the new mounting bracket assembly from the fixture. Place the mounting plate (A) over the junction box so that the folded sides extend out away from the wall and the holes (I) are aligned with one centered at the bottom. Pull the house wires through the center of mounting plate (A) and secure mounting plate (A) to the junction box by tightening the screws (B).

CONNECTING THE WIRES

Have a helper support the fixture's weight while completing the wiring. Attach the fixture's wires to the power supply wires from the junction box. Connect black to black (live); white to white (neutral); grounding to grounding (green or copper). Twist the ends of the wire pairs together then twist on a wire connector. Make sure all twists are in the same direction. Loop fixture's ground wire around grounding screw (C) and tighten. If there is no ground wire (green or copper) from the junction box, contact a qualified electrician.

FINISHING THE INSTALLATION

Place the backplate (E) over the mounting plate (A) making sure to align the holes of the fixture with the holes of the mounting plate. Secure the fixture with rubber gaskets (J) and screws (D). Run a bead of RTV silicone sealant (not included) around the backplate where it meets the exterior wall to ensure a waterproof seal. Slide shade (G) over the socket (F) and secure with socket ring (H). Install light bulb (not included) in accordance with the fixture's specifications. Do not exceed the recommended wattage. Your installation is now completed. Turn on the power and test the fixture.

CLEANING TIPS

Treat the fixture gently! Regular cleaning will reduce the need for deep cleaning. For regular cleaning, turn off the light and wipe down the fixture with a clean lint-free cotton or microfiber cloth. Never spray cleaner directly onto the fixture.

INSTALLATION INSTRUCTIONS INSTRUCCIONES DE INSTALACIÓN/ INSTRUCTIONS D'INSTALLATION

⚠ WARNING

- To avoid possible electrical shock, before installing your light fixture, disconnect the power by turning off the circuit breakers to the outlet box associated with the wall switch location.
- The lighting fixture must be grounded. If the ground wire for the installation site is not present, immediately **STOP** installation and consult a qualified electrician.
- All wiring must be in accordance with national and local electrical codes ANSI/NFPA 70. If you are unfamiliar with wiring or in doubt, consult a qualified electrician.

READ AND SAVE THESE INSTRUCTIONS
These instructions are provided for your safety. It is very important that they are read carefully and completely before beginning installation of the lighting fixture.

⚠ ADVERTENCIA

- Para evitar una posible descarga eléctrica, antes de instalar su lámpara, desconecte la energía apagando los interruptores automáticos (breakers) que alimentan la caja de salida asociada con la ubicación del interruptor de pared.
- La lámpara se debe conectar a tierra. Si el alambre de conexión a tierra no está presente en el sitio de la instalación, **DETENGA** inmediatamente la instalación y consulte con un electricista calificado.
- Todo el cableado debe realizarse de acuerdo con los códigos eléctricos locales y nacionales ANSI/NFPA 70. Si no está familiarizado con el cableado, o si tiene duda, consulte a un electricista calificado.

LEA Y GUARDE ESTAS INSTRUCCIONES
Estas instrucciones se proporcionan para su seguridad. Es muy importante leerlas detenidamente y completamente antes de comenzar la instalación de la lámpara.

⚠ AVERTISSEMENT

- Pour éviter tout choc électrique, avant d'installer le luminaire, coupez le courant en éteignant les disjoncteurs de la boîte électrique associée à l'interrupteur mural.
- Le luminaire doit être mis à la terre. Si le fil de terre du lieu d'installation n'est pas présent, **ARRÊTER** immédiatement l'installation et consulter un électricien qualifié.
- Tout le câblage doit être conforme aux codes électriques nationaux et locaux en vigueur et à la norme ANSI/NFPA 70. Si vous n'avez pas l'habitude de faire ce câblage ou en cas de doute, adressez-vous à un électricien qualifié.

LISEZ ET CONSERVEZ CES INSTRUCTIONS
Ces instructions sont fournies pour votre sécurité. Il est très important de les lire attentivement dans leur intégralité avant d'entreprendre l'installation du luminaire.
